OFFICIAL PUBLICATION OF THE LOUISIANA ARCHITECTS ASSOCIATION

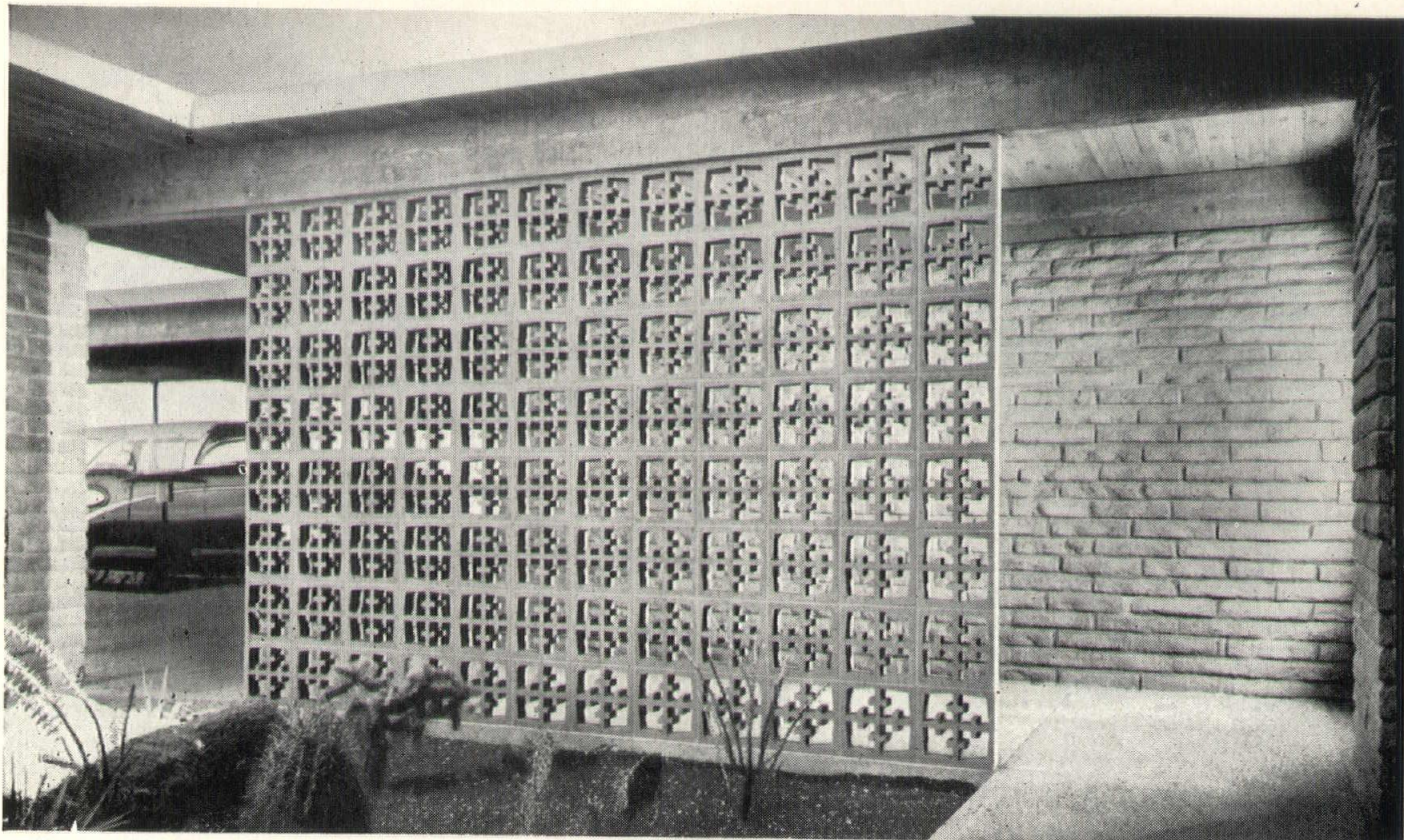

**top rung - that's us!** WE'RE NOT BOASTING. WE'RE ILLUSTRATING. THAT'S AN ACTUAL PHOTO OF OUR SERIES 128. IT CARRIES OUR SYMBOL OF EXCELLENCE. AS YOU CAN SEE IT IS VERY STRONG. STANDS JUST ABOUT ANY KIND OF TREATMENT. KIDS CAN CLIMB ON IT. WORKMAN CAN STAND ON IT. YOU CAN DEPEND ON IT. OBVIOUSLY!

IT'S NOT A MIAMI WINDOW UNLESS IT'S MADE BY  
**MIAMI WINDOW CORPORATION**

P. O. BOX 48-877, INTERNATIONAL AIRPORT BRANCH, MIAMI, FLORIDA

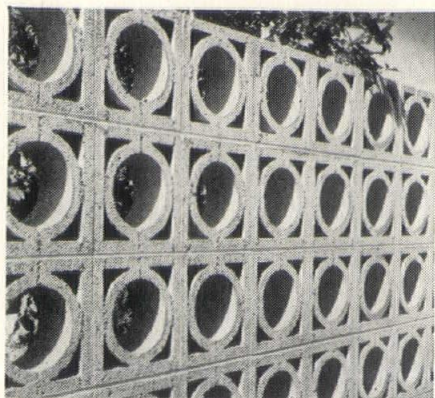

*"Lace curtain" concrete masonry provides decorative entrance.*

## TAKE A NEW APPROACH TO OUTDOOR BEAUTY WITH **MODERN CONCRETE**

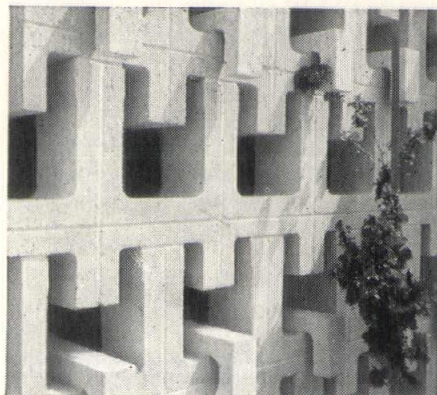

Today, concrete is building a reputation as the basic material of a "million" winning ideas.

Take grille block, for example. Hundreds of different patterns are now offered. Every day sees new uses of grille block in sight screens, solar screens and carport walls—to name just a few.

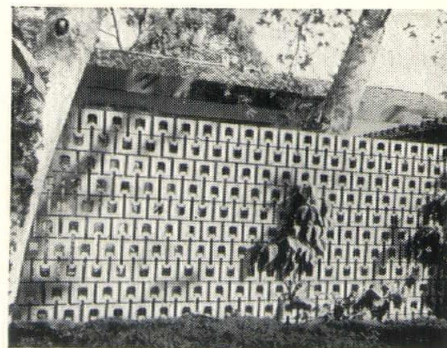

Scores of other examples of what concrete, plus imagination, can produce are seen everywhere . . . in reflecting pools, terraces, patios, and in garden walks and walls. Cast-in-place, precast, colored, textured or polished, modern concrete is the low-cost way to create truly beautiful effects outdoors.

*Concrete grille block garden wall with novel geometric design.*

*Close-up of decorative grille block used for intriguing wall pattern.*

*Attractive concrete block sight screen encloses patio for breezy seclusion.*

### **PORTLAND CEMENT ASSOCIATION**

611 Gravier Street,  
New Orleans 12, Louisiana

*A national organization to  
improve and extend the uses of concrete*

# LOUISIANA ARCHITECT

OFFICIAL JOURNAL OF THE LOUISIANA ARCHITECTS ASSOCIATION

1962

VOLUME 1 NUMBER 10

THE LOUISIANA ARCHITECT, Official Journal of the Louisiana Architects Association of the American Institute of Architects, is owned by the Louisiana Architects Association, not for profit, and is published monthly, Suite 200, Capitol House Hotel, Baton Rouge, La., telephone DI 8-4331. Editorial contributions are welcomed but publication cannot be guaranteed. Opinions expressed by contributors are not necessarily those of the Editor or the Louisiana Architects Association. Editorial material may be freely reprinted by other official AIA publications, provided full credit is given to the author and to the LOUISIANA ARCHITECT for prior use.

## THIS ISSUE

presents a roster of the Louisiana Architects Association, the Tennessee Society of Architects and the three state-wide chapters in Arkansas, Mississippi and Alabama. The membership of these five components of the American Institute of Architects makes up the Gulf States Region of the AIA. Other states and regions annually publish a similar roster issue as a service to the membership of the pertinent territory. This particular type of issue has also been found to be particularly beneficial to advertisers since it is one generally kept by members for ready reference, and consequently, the ad makes repeated impressions.

---

JOHN SCHAEFFER again presents an appropriate cover.

## ADJUSTABLE ANCHORING SYSTEM

SOLVES PROBLEMS OF SECURING RAILINGS TO CONCRETE BY  
BECOMING AN INTEGRAL PART OF THE STAIR STRUCTURE

- INSURES EXTREME RIGIDITY
- REDUCES COSTLY FIELD LABOR
- ELIMINATES BREAKAGE IN MASONRY
- ADJUSTABLE FOR POST ALIGNMENT

*Versatile  
Heat Pump  
Complements  
Any  
Building Design*

The flameless electric Heat Pump is adaptable to any architectural design. It saves space. No cooling tower. No flue. No chimney. And too, the efficient economic unit is automatic. Has humidity control year 'round. It's today's best year-round air conditioning BARGAIN.

call your **Gulf States Utilities** office or your  
heat pump dealer.

## PRICE ALONE DOES NOT DETERMINE THE VALUE OF A PRODUCT

Our jobs are based upon furnishing materials of the finest quality, fabricated to exacting tolerances by workmen experienced in quality construction.

A good reputation can't be purchased; it must be earned. We of Alumaglass realize this. That's why throughout our business life we have constantly endeavored to make each year always better in terms of customer service and product selection. Our field installation and maintenance service matches our product quality.

## **DESIGN ECONOMY AND FLEXIBILITY...**

with

### **STRAIGHT-LINE DESIGN**

Mason contractors in three major cities, estimating comparative costs on a square-foot basis, solidly confirmed the greater economy of ARKETEX STRAIGHT-LINE DESIGN for construction of a given wall area. Officially checked and verified savings over conventional application of ceramic glazed structural tile ranged from 12% to 20%. AND these sizable savings are gained in addition to design flexibility plus maintenance-free durability unequalled by any comparable architectural medium . . . PLUS the unmatched advantage of 36 New Direction Colors, developed exclusively for ARKETEX by Raymond Loewy Associates, Inc. Better contemporary architecture calls for STRAIGHT-LINE DESIGN Ceramic Glazed Structural Tile — by ARKETEX. Call or write for proof.

*new*  *direction in* **COLOR**

selected for better architecture by  
Raymond Loewy Associates, Inc.

# Candela Will Keynote Meeting

Internationally known design and construction authorities will participate in the Prestressed Concrete Institute's 8th annual national convention in New Orleans, Sept. 23-28.

Felix Candela, architect and engineer from Mexico, who has gained world wide recognition for his advanced design structures, will be keynote speaker.

Some 1,000 architects, engineers and affiliates of the prestressed concrete industry are expected to attend the New Orleans sessions.

In addition to speakers from the United States, noted engineers Dr. P. W. Abeles and O. A. Keren-sky, both of London, England, will participate. Dr. Abeles will speak on "Partial Prestressing in Europe," while Keren-sky will discuss "Long Span Bridge Design."

## Six Sessions

Convention activities will include six full half-day sessions on newest developments in design, connections, technical activity committee reports, research and production techniques.

Authorities from this country who have accepted invitations to deliver major papers include T. Y. Lin, University of California, "Load Balancing Concept"; Neal Fitzsimmons, Director, Protective Structures Division, Office of Civil Defense, "Designing Dual Purpose Shelters"; George Duecy, Associated Sand & Gravel, "Fabricating Material for Federal Science Pavilion"; W. Burr Bennett, Portland Cement Association, "Limit Design With Prestressed Concrete"; Joseph Walker, Portland Cement Association, "Report on Laboratory Studies on Prestressed Concrete"; F. P. and E. J. Ruble, Association of American Railroads, "Railroads Research on Prestressed Concrete."

## Report on Congress

In an early session Ben C. Gerwick, Jr., will report on the activities of the F.I.P. Congress.

A discussion on future possibilities for the prestressing industry will be moderated by William Avery, publisher of Concrete Construction magazine.

Another important section of the convention will cover connection details. Papers to be presented in-

clude chairman Thomas A. Hanson, precast concrete connections; Irwin J. Speyer, column bases and column splices; Alfred A. Yee, beam to column connections; Laurence Cazaly, beam to girder connections; Felix Kulka, floor and roof slabs to beams, and H. Carl Walker, floor and roof slabs to masonry walls.

Now practicing in Mexico City, Candela is recognized as one of the leading exponents of the future potentialities of the hyperbolic paraboloid in architecture. To simple cylinder shells and dome and barrel vaults Candela adds highly complicated structures such as folded plate slabs and interpretations of hyperbolic curved surfaces of the most varied plan.

Candela is regarded as one of the pioneers in the development of new applications of the hyperbolic paraboloid, opening a vast new world in space spanning structures.

Doctor Felix Candela

Some outstanding examples of his work, all in Mexico, include: structures for the Bacardi company with joined vaults each 100-ft. square formed by hyperbolic paraboloid shells  $1\frac{1}{2}$ -in. thick with another part of the complex containing multiple umbrellas, 40x50-ft., formed by HP shells, also  $1\frac{1}{2}$ -in. thick; Los Manantiales restaurant, designed in the form of a lotus, a symmetrical structure composed of eight groined vaults formed by the meeting of four double curving HP's; a bandstand in Santa Fe, combining six shell forms cantilevered out 40-ft.; a laboratory for the Lederle Co., with some 61,000 sq. ft. covered by 5 HP's. ranging in size from 10 x 20-ft. to some 43-ft. square, plus 14 cylindrical shells and cantilevered conoids.

## Candela Articles

Articles contributed to American architectural magazines and journals include such subjects as "Stereo Structures," "The Shell As a Space Encloser," "Structural Digressions Around Style in Architecture," "Understanding the Hyperbolic Paraboloid," and "Toward a New Philosophy of Structures."

Felix Candela's bottling hall for BACARDI in Mexico. Joined vaults are formed by hyperbolic paraboloid shells  $1\frac{1}{2}$ " thick. Each vault is 100 ft. square.

# NOTICE

TO ALL CONTRACTORS, ARCHITECTS AND AWARDING AUTHORITIES:

We urge you to comply with an **important** change in the Contractors Licensing Law. In the recent session of the Legislature, the law was amended to require that a contractor certify that he is licensed under Act 33 of 1956 by showing his license number on the bid above his signature or above the signature of his duly authorized representative.

All bids of \$30,000.00 or more not in accordance with the above requirement shall be automatically rejected and not read. Any contractor submitting a bid in the amount of \$30,000.00 or more without complying with the above requirement shall be acting in violation of Act 233 and shall be subject to all provisions for violations and penalties thereof.

## Acoustron Language Laboratory

Gives  
Dependable Service  
at LSU

A full year's performance of 120 Acoustron-equipped student language booths at Louisiana State University proves to be uniquely successful. The remarkable simplicity of design and durable components of the Acoustron language laboratory put an end to aggravating and costly breakdowns. Acoustron utilizes experience such as this in engineering research to continue the improvement of its production units.

Acoustron's revolutionary headset unit eliminates both student microphone and amplifier. The specially designed instructor's monitor, intercom amplifier and complete electronic circuitry will give many years of stable high fidelity performance.

Acoustron language laboratories can be furnished to fit any classroom requirement from architect-designed laboratory rooms to converted or part time language classrooms—with or without soundproof booths. Insure your client's satisfaction by specifying Acoustron.
